

# APS-3xx.2/ -xAL/ -EV

Digital, programmable microphone console

APS-308.2-EV

APS-316.2-EV

APS-324.2-EV

APS-308.2-3AL-EV

APS-308.2-6AL-EV

APS-316.2-3AL-EV Wall mounted version

## Features

The new series of digital microphone consoles is equipped with freely programmable key functions such as group selection, text triggering and display functions. A better overview of the zones, groups and/or functions can be marked by coloured LEDs/labels.

RJ45 cabling of up to 11 microphone consoles – with or without function maintenance cables.

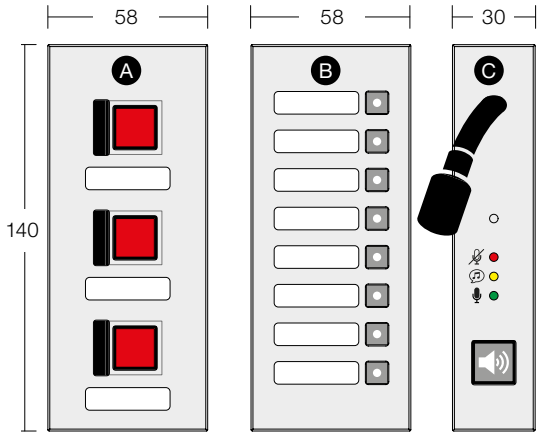

Expansion into segments of 8 freely programmable buttons with LED – can be combined with segments of 3 alarm buttons each with protective cover. A maximum of 8 modules per microphone desk is possible.

Microphone console also available as wall-mounted model (surface-mounted).

Built-in generator for periodic monitoring of the AF line and the microphone via APS-177-EV.

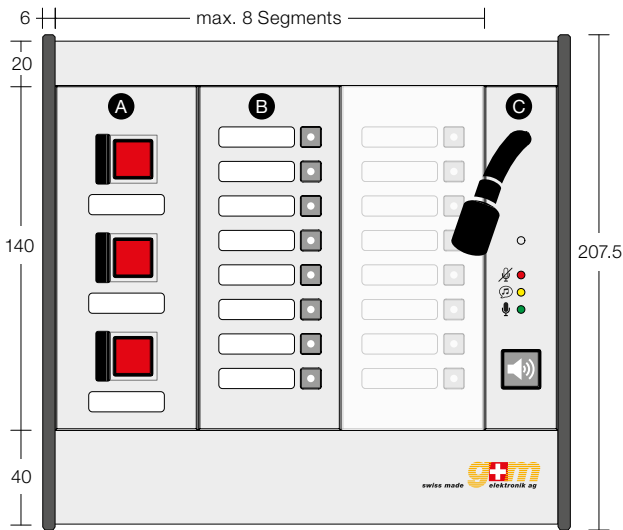

Status indication via multi-coloured LEDs and alarm buzzer in case of malfunctions.
